**DETAILED ACTION**

***Allowable Subject Matter***

1. Claims 1-11 are allowed and all previously made rejections/objections are withdrawn.
2. The following is an examiner's statement of reasons for allowance: the rejections have been overcome by the present amendments and accompanying remarks. More specifically, there was no prior art that teaches or suggests roofing membrane which is compatible with bituminous adhesives comprising an outer layer of EPDM, EPM, TPO, PVC or CSPE bonded to a protective layer which is further in turn bonded via adhesives to a fleecy layer. The novelty of this invention lies in the presence of the protective layer found between the fleece layer and upper outer layer, which is resistant to bituminous adhesives and thus prevents their migration.

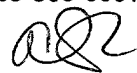

Harkness appears to be the closest prior art but fails to teach the presence of a protective layer that does not allow the migration of the bituminous adhesive to flow up through the composite to the upper outer layer.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
